PHARMACY CAREER OPPORTUNITY

We are looking for the right staff pharmacist to join our team of professionals in a dynamic hospital-based pharmacy offering “the right mix” of Clinical and Distributive services. This is a full time position (four ten-hour shifts) with a competitive compensation package and full range of benefits.

Our staff pharmacists are active members of our patient care teams and work collaboratively with the Nursing and Medical staff members. The clinical pharmacy services program decentralizes the pharmacists from the distributing area to the patient care floor. This program expands the value of pharmacy services by enhancing patient safety and improving pharmaceutical care.

St. Joseph’s Hospital is a 95 bed primary care facility located in **Buckhannon**, West Virginia. Services offered at the facility include, urology, general surgery, orthopedics, gynecology, obstetrics, internal medicine, family medicine, palliative care, home health, hospice and oncology.

A BS is required; Pharm D is preferred. A valid WV license is required. Consider becoming part of this pharmacy team and experience the satisfaction of knowing you are practicing pharmacy the way it was meant to be practiced – in a progressive and caring hospital environment.

An application is available on line at www.stj.net. Or, please forward your CV to Anissa Hite-Davis, Human Resources, St. Joseph’s Hospital, One Amalia Drive, Buckhannon, WV 26201. Questions? Please call **Eric Strother, Director of Pharmacy** at 304-473-2151.
