New Pharmacy Manager Position - WVU Hospitals

In response to the growth of the Pharmacy Residency Program, the demand for greater focus on financial performance and the growing operational needs of the department, we will be hiring another manager. This manager will be in charge of pharmacy operations (centralized and decentralized), and will be the direct supervisor to the pharmacist, as Tim is to the technicians. As soon as the position description is complete we will be posting this position. Plans to recruit at the ASHP Midyear meeting are underway as well.
