3:15pm	Break
3:30pm	*Emergency Contraception – An Overview (Application-based) Anduwyn Williams ACPE UAN 0072-0000-16-024-L04-P
4:30pm	Questions/Conclusion

**This program was originally offered on 4/10/16 in Martinsburg, WV, on 4/24/16 in Vienna, WV, and on 5/13/16 in Barboursville, WV. If one attended any of these sessions, additional credit will not be awarded.*

Learning Objectives

To Breathe or Not to Breathe - That is the Question: What Pharmacists Need to Know about Naloxone

- Describe the pharmacology and classification of opiates and opioids based on chemical structure, mechanism of action, potency, and controlled substance classes.
- List the morphine milligram equivalent for at least 4 opiates and opioids.
- Identify common side effects associated with opiates and opioids and how to effectively counsel patients

regarding expectations and management of the side effects.

- Describe the “opioid epidemic” in relation to the history, prescribing patterns, and overdose patterns of opiates and opioids.
- Identify signs and symptoms of opioid toxicity beyond the classic opioid toxidrome and describe the relationship between the type of opioid taken in overdose and the clinical effects to expect.
- Describe the pharmacology of naloxone and use this information to predict response after naloxone administration.
- List 4 reasons why an individual with an opioid overdose may not respond to naloxone.
- Describe at least 3 reasons why medical care after naloxone administration is required.
- Discuss how to use intranasal and intramuscular Naloxone.
- Identify the possible responses to intranasal and intramuscular Naloxone.
- Prepare and administer intranasal and intramuscular Naloxone.
- Describe how continued support should be provided to the overdose victim.

Legislative Update - Issues important to Pharmacy from the 2016 Session

- Discuss issues surrounding the Tug Valley decision allowing addicts to sue pharmacists and the legislature's reaction.
- State the changes to public policy on substance abuse and the use of naloxone.
- Discuss other new statutes important to pharmacy.

Drugs in Pregnancy and Lactation

- Discuss the limitations of the existing pregnancy and lactation labeling.
- State the new pregnancy and lactation labeling rule.
- Identify the importance of comparing both the risks and benefits of medication use in pregnancy and lactation.
- Use the updated labeling and other resources to make evidence based recommendations for medication use in pregnancy and lactation.

Emergency Contraception – An Overview

- Discuss the WV FREE Emergency Contraception secret shop and findings.
- Define Emergency Contraception and identify different types of Emergency Contraception.
- Identify the myths and facts of Emergency Contraception.

- Discuss age requirements related to Emergency Contraception.
- Identify barriers and how to remove them related to the customer purchasing Emergency Contraception.
- Apply scenarios around different kinds of customers seeking to buy emergency contraception.

Continuing Education

West Virginia University School of Pharmacy (WVUSoP) is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education (CPE). This activity, ACPE UAN 0072-0000-16-085 to 087 and 0072-0000-16-024-L04-P is approved for 6.0 contact hours (0.6 ceu's) of CPE credit. WVU SoP will report your participation in the activity to NABP CPE Monitor within 4-6 weeks for all participants who successfully complete each session. Successful completion includes attending the entire session, signing the attendance sheet and completing an online evaluation form for each session attended. Transcripts of CPE can be printed from NABP CPE Monitor. If needed, statements of credit may be printed at <https://pharmacyce.wvu.edu/user/login>.
