*** This session was originally presented in Vienna, WV on April 23, 2017, and Flatwoods, WV on June 11, 2017. If you attended either of these sessions, additional credit will not be awarded.**

LEARNING OBJECTIVES

Updates in Prescription Drug Diversion, Substance Use Disorders, and Pain Management, and Managing Patients Prescribed Buprenorphine and Naloxone Products (Application-based)

- Discuss what comprises drug diversion, including West Virginia statistics on prescription drug abuse and resulting deaths.
- State the epidemiology of chronic pain and misuse of opioids.
- Describe the indicators for opioids in chronic pain treatment including general characteristics, toxicities, and drug interactions.
- Outline patient evaluation and risk assessment and tools to assess risk and monitor benefits.
- Explain the initiation and ongoing-management of chronic pain in patients treated with opioid based therapies.
- Discuss a case study of a patient with chronic pain.
- Identify diversion and drug seeking behaviors and tactics.
- State best practice methods for working with patients, prescribers, and law enforcement concerning patients suspected of drug seeking behavior and diversion.
- Give examples of compliance with controlled substances laws.
- Identify registration with and use of the West Virginia Controlled Substances Monitoring Program established in West Virginia Code 60 A91.
- Define specific indications and rationales for use of buprenorphine products.
- Communicate optimal pain management considerations to prescribers of buprenorphine products.
- Review the dispensing guidelines on naloxone products to concerned individuals of potential overdose patients.

Recent Pharmacological and Therapeutic Developments Affecting Pharmacists (Application-based)

- Identify essential information to more effectively counsel patients on recently introduced drugs.
- Compare and contrast changes in the current therapeutic approach to various disease processes.
- Evaluate evidence-based studies to appropriately respond to questions and concerns from prescribers and patients on recent reports in the health professions literature.

Updates in Dementia for the Pharmacist (Knowledge-based)

- Describe the DSM V approach to categorizing dementia to better understand differences among patients with cognitive impairment.
- Evaluate the treatment of a patient with dementia including drugs that may be worsening symptoms, helping with cognition, and being used to treat behavioral manifestations.
- Implement simple strategies to improve dementia screening, therapy monitoring, and caregiver support at your practice site.

CONTINUING EDUCATION

West Virginia University School of Pharmacy (WVUSoP) is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education (CPE). This activity is accredited up to a total of 6.0 contact hours, or 0.6 CEUs, for pharmacists. WVU SoP will report your participation in the activity to NABP CPE Monitor within 4-6 weeks for all participants who successfully complete each session. Successful completion includes attending the entire session, signing the attendance sheet and completing an online evaluation form for each session attended. Transcripts of CPE can be printed from NABP CPE Monitor. If needed, statements of credit may be printed at <https://pharmacyce.wvu.edu/user/login>.
