
**AMERICAN PHARMACISTS ASSOCIATION'S
PHARMACY-BASED IMMUNIZATION DELIVERY**

A CERTIFICATE PROGRAM FOR PHARMACISTS

HOSTED BY: WEST VIRGINIA UNIVERSITY SCHOOL OF PHARMACY

SEPTEMBER 30, 2017

HEALTH SCIENCES CENTER, ROOM 2940 A AND B – MORGANTOWN, WV

For questions about this program, please contact:

Michael Kurilla at 304-293-5103/304-293-1553 OR MPKURILLA@HSC.WVU.EDU

APhA's Pharmacy-Based Immunization Delivery certificate training program is based on national educational standards for immunization training from the Centers for Disease Control and Prevention. This practice-based curriculum represents a fusion of science and clinical pharmacy. The program, which emphasizes a health care team approach, seeks to foster the implementation of interventions that will promote disease prevention and public health. The purpose of this certificate training program is to prepare pharmacists with comprehensive knowledge, skills, and resources necessary to provide immunization services to patients across the life span.

The goals of this program are to:

Educate pharmacists about:

- ❖ The impact of vaccines on public health.
- ❖ Pharmacists' roles in immunization.
- ❖ Immunologic principles of vaccine development and immunizations.
- ❖ Vaccine-preventable diseases and the vaccines used to prevent them.
- ❖ Strategies for improving immunization rates.
- ❖ Requirements for pharmacists who provide immunization services.

Prepare pharmacists to:

- ❖ Read an immunization schedule and identify appropriate vaccines for individuals across the life span and with special needs.
- ❖ Educate patients about the benefits of vaccines and dispel myths about vaccines.
- ❖ Safely administer vaccines to patients via subcutaneous, intramuscular, intranasal, and intradermal routes.
- ❖ Operate an immunization service in compliance with legal and regulatory standards.
- ❖ Partner with immunization stakeholders to promote immunizations and the immunization neighborhood.

Direct pharmacists to resources necessary to:

- ❖ Promote public health through immunizations.
- ❖ Access regularly updated information about vaccines and their use.
- ❖ Effectively communicate with patients and other stakeholders about resources.
- ❖ Operate an immunization service in compliance with legal and regulatory standards.

There are three components to the certificate training program:

- 12 hour (1.2 CEU) self-study modules with case studies and assessment exam
- 8.0 hour (0.80 CEU) live seminar with final exam
- Hands-on assessment of intramuscular and subcutaneous injection technique

Self-Study Modules Description and Learning Objectives

The self-study learning activity is designed to ensure that all participants have an understanding of vaccine-preventable diseases and the role of pharmacists as vaccine advocates and administrators. There are five learning modules that present in-depth information on immunology, practice implementation, and legal and regulatory issues as noted below, with appropriate references to the Centers for Disease Control and Prevention (CDC) resource publication, *Epidemiology and Prevention of Vaccine-Preventable Disease*. The self-study program includes a self-assessment test and real-life case studies that are designed to help reinforce and evaluate participants' understanding of key information and concepts.

Module 1. Pharmacists, Vaccines, and Public Health

At the completion of this activity, participants will be able to:

- Describe the effects of immunizations on morbidity and mortality rates of vaccine-preventable diseases in the United States.
- Discuss Healthy People 2020 goals for vaccination rates in the United States.
- Explain the recent expansion of the role of pharmacists as vaccine providers and describe the status of pharmacists' authorization to administer vaccines throughout the United States.
- Describe strategies for pharmacists to advocate for pharmacy-based delivery of vaccines.
- Discuss the role of pharmacists as immunizers in emergency preparedness activities.
- Identify resources that are useful for immunization providers and educators.

Module 2. Overview of Immunology and Vaccine Development

At the completion of this activity, participants will be able to:

- Identify the differences between active and passive immunity and describe key elements of each process.
- Explain how vaccines elicit an immune response and provide protection from disease.
- Describe the characteristics of and distinctions among live vaccines, inactivated vaccines, polysaccharide vaccines, and recombinant vaccines.
- Discuss the rationale for timing of vaccine administration and intervals between doses, including vaccine-vaccine spacing and vaccine-antibody spacing.
- Describe principles of herd immunity.

Module 3. Vaccine-Preventable Diseases

At the completion of this activity, participants will be able to:

- Describe the epidemiology, clinical features, and potential complications of diseases that can be prevented with vaccines.
- Identify vaccines available in the U.S. market for each vaccine-preventable disease and describe their features.
- Identify the contraindications and precautions for the use of vaccines available in the United States.
- Use recommendations from the Advisory Committee on Immunization Practices to identify target groups for receipt of each vaccine.

Module 4. Patient Care Considerations for Immunizing Pharmacists

At the completion of this activity, participants will be able to:

- Identify patients with immunization needs.
- Given a patient case, select appropriate vaccines using an immunization schedule from the Advisory Committee on Immunization Practices, and identify appropriate timing, doses, and routes of administration.
- Discuss the rationale for timing for vaccine administration and intervals between doses, including vaccine-vaccine spacing and vaccine-antibody spacing.
- Recall recommended patient screening questions for vaccination and identify valid contraindications for vaccinations.

- Educate patients about the benefits of vaccines and address common concerns about vaccines.
- Provide accurate information that addresses common myths about vaccines.
- Describe the roles of the Vaccine Adverse Event Reporting System in managing vaccine safety.
- Educate patients about potential adverse reactions following the receipt of a vaccine and how to manage them.
- Explain appropriate techniques for intramuscular, subcutaneous, intradermal, and intranasal administration of vaccines.
- Describe the signs and symptoms of adverse reactions to vaccines and procedures that pharmacists should follow to manage various adverse reactions.
- Describe appropriate documentation and follow-up after vaccine administration.

Module 5. Operating a Pharmacy-Based Immunization Program

At the completion of this activity, participants will be able to:

- Describe important considerations when deciding which vaccines to offer.
- Describe physical space requirements for a vaccine service.
- Discuss Occupational Safety and Health Administration regulations for the prevention of employee exposure to bloodborne pathogens and needlestick injury at worksites where immunizations are administered.
- Outline principles and procedures for vaccine storage and handling.
- Discuss workflow options for administering vaccines in pharmacy practice.
- Identify marketing strategies that can be used to promote a pharmacy-based immunization service.
- Explain potential options for obtaining reimbursement and compensation for vaccines and vaccine administration.
- Describe liability issues related to vaccine administration, including the Vaccine Injury Compensation Program

Live Training Seminar Description and Learning Objectives

The second part of the certificate training program is an active learning seminar focusing on pharmacy practice implementation. The live training seminar is based on the experience of practitioners involved in immunization advocacy and administration. The training seminar reinforces and expands on the self-study program and addresses areas such as immunization needs, legal and regulatory issues, and injection-technique training. Participants will be expected to practice giving intramuscular and subcutaneous injections on each other.

After completing the live seminar, participants will be able to:

- Describe strategies for increasing immunization rates, including physician collaborations, community level activities, and immunization coalition activities.
- Review adult patient cases and make patient-specific recommendations based on the appropriate immunization schedule.
- Review a pediatric patient case and make patient-specific recommendations based on the appropriate immunization schedule.
- Demonstrate effective strategies for communicating with patients who have concerns about vaccines.
- Describe current evidence that explores the relationship between autism and vaccines.
- Describe a process for administering vaccines in a community pharmacy.
- Identify the signs and symptoms of adverse reactions that can occur after vaccination.
- Describe procedures for management of patients with adverse reactions to vaccination that constitute an emergency.
- List the steps for intranasal administration of the live attenuated influenza vaccine.
- Demonstrate appropriate intramuscular and subcutaneous injection techniques for adult immunization.

All participants are strongly encouraged to obtain CPR or BCLS certification. *However, certification is not a prerequisite of the program.* A Certificate of Achievement is awarded to participants who successfully complete all program requirements. The Certificate of Achievement is invalid, however, without written proof of current CPR or BCLS certification. WV Code Section 30-5-30 requires either American Red Cross or American Heart Association basic life-support training certification to be an immunizing pharmacist in the state of WV.

Seminar Agenda

- **7:30am** – Check-in and Continental Breakfast
- **8:00am** – Welcome, Introductions and Acknowledgements
- Clinical Review
- **10:00am – Morning Break**
- **10:15am** – Managing a Pharmacy-Based Immunization Program
- Strategies for Increasing Immunization Rates
- **12:00pm – Lunch**
- **1:00pm** - Applying ACIP Immunization Schedules
- Communicating with Patients
- **Afternoon Break**
- Vaccine Administration Technique
- Transitional/Summary Remarks
- **4:00pm** – Skills Assessment

Faculty

Dani Dolin, PharmD, CDE, CPT, Clinical Pharmacist, White Hall Pharmacy Diabetes, Immunization, and MTM Services, and Medtronic Minimed Certified Product Trainer, Morgantown, WV

Craig Kimble, PharmD, MBA, MS, BCACP, Director of Experiential Learning / Manager of Clinical Support Services, Assistant Professor of Pharmacy Practice, Marshall University School of Pharmacy, Huntington, WV

Accreditation Information

The American Pharmacists Association is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. The home-study portion of the Pharmacy-Based Immunization Delivery certificate training program is approved for 12 contact hours (1.2 CEUs) of continuing pharmacy education credit (UAN 0202-9999-17-160-H06-P). The live training seminar is approved for 8 contact hours (0.8 CEU) of continuing pharmacy education credit (UAN 0202-9999-17-161-L06-P).

Initial Release Date: July 15, 2017

Expiration date: July 15, 2020 - PLEASE NOTE: NO Home Study credit granted after this date; Live Credit can only be granted within 60 days from the day of the seminar attended.

Activity Completion Requirements

To obtain credit for "**Pharmacy-Based Immunization Delivery**" complete home study activities, complete both home study and final assessments with a grade of 70% or better, attend the live seminar, successfully complete the injection technique assessment, complete the evaluation, and CLAIM credit. *To obtain credit, the Learner must CLAIM credit once each component is completed.* Once credit is claimed, Transcripts of CPE will be available online within 24 hours on the Learner's CPE Monitor profile at www.nabp.net. The Certificate of Achievement will be available online upon successful completion of the necessary activity requirements on the participant's "My Training" page on www.pharmacist.com.

Pharmacy-Based Immunization Delivery: A Certificate Training Program for Pharmacists was developed by the American Pharmacists Association.

Technology Requirements - Computer and Internet access is required to complete this activity.

These technology requirements and suggestions will allow you a better online learning experience. In order to participate in any APhA online learning activity, participants must have access to a computer with these minimum system requirements:

Hardware Requirements

128MB of RAM, 16-bit video card capable of 1024x768 screen resolution or better
Speakers or headphones, if accessing content with audio

Software Requirements

Internet Browsers, IE 8 and greater, Microsoft Edge 12 and greater, Firefox 4 and greater*, Google Chrome*, Safari 5 and greater

These browsers automatically update themselves behind the scenes to the most current version

Operating Systems, Windows XP, Windows 7 and 8, Windows Vista, Mac OSX, iOS devices (tablets and phones): please note iPads do not currently allow Adobe Support to be downloaded onto the device, Android devices (tablets and phones), Windows 10

Please visit APhA's website for a complete list of [Technology System Requirements](#) to have a positive learning experience.

Program Costs

Each seminar is limited to a maximum of 60 people. Registration will be taken on a first-come, first-served basis. Participant cost will be \$400 per pharmacist and \$300 per student. This amount includes the cost of self-study and live seminar materials, continuing pharmacy education credit, continental breakfast, lunch, and breaks. Lodging, travel, and dinner expenses will be the responsibility of the participant. Cancellations received in writing at least 7 days prior to each program (fax 304-293-2529 or e-mail mpkurilla@hsc.wvu.edu) will be charged a \$150 cancellation fee then refunded the remaining registration fee. We reserve the right to cancel the entire program. In the event of a conference cancellation, each participant will be notified via phone and a full tuition refund will be made.

Location, Directions, Parking

Located at the intersection of I-79 and I-68, WVU is approximately 70 miles south of Pittsburgh and 200 miles northwest of Washington DC. It is accessible by the Morgantown Municipal Airport (MGW) or the Pittsburgh International Airport (PIT).

From I-79, take exit 155 (West Virginia University and Star City) and turn towards Morgantown. At the 2nd traffic light, bear slightly to the right onto US 19 South and proceed to the 2nd traffic light (WVU Coliseum - large domed concrete building on the right). Turn left onto Patteson Drive. Just before the 3rd traffic light, turn right onto Elmer Prince Drive. Move into the left lane and follow the signs to Health Sciences Center or the Emergency Room (the road will curve into a turnabout and follow the arrows uphill to McQuain Pavilion).

Pass the small guard booth and continue into the parking lots (parking is not restricted since this is a weekend event). Enter the Health Sciences Center North through the Family Medicine Entrance. There will be WVU School of Pharmacy signs outside and inside directing you to the program.

Pharmacy-Based Immunization Delivery Certificate Program Registration Form

September 30, 2017 – Robert C Byrd Health Sciences Center North, Room 2940 A and B – Morgantown, WV

Each seminar is limited to a maximum of 60 people. Registrations will be taken on a first-come, first-served basis. Registration is required at least seven days prior to each program.

Preferred registration and payment is online in our continuing education management system at **<https://pharmacyce.wvu.edu/user/login>** with a Visa, MasterCard, American Express, or Discover Card.

You can fax registration form to 304-293-2529. For registration and payment assistance please contact Michael Kurilla, M.Ed., CE Program Specialist at 304-293-5103 or email **mpkurilla@hsc.wvu.edu**, or contact Dr. Ginger Scott, Director of Continuing Education, at 304-293-5103 or email **vsconfig@hsc.wvu.edu**.

Please print or type: (One form per pharmacist)
